Piecing Instructions

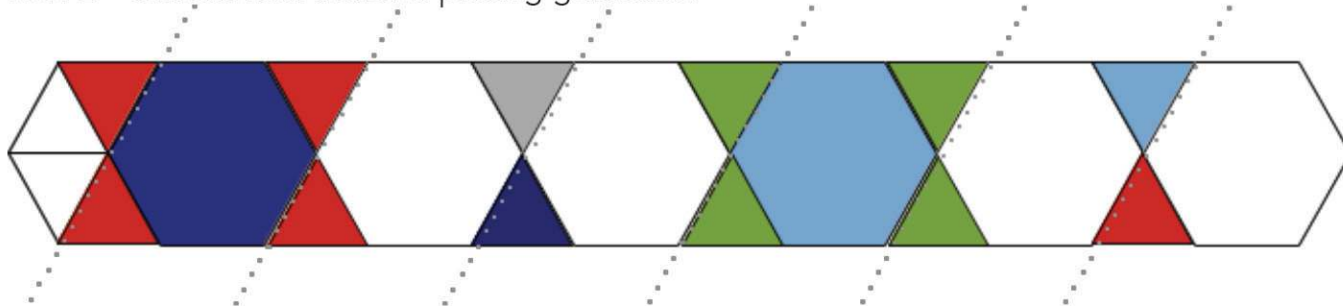

The quilt center will be sewn in horizontal rows, with the top and bottom rows being half hexagons and triangles. Some of the edge pieces will be larger than they need to be. You will trim these off when the quilt center is complete.

Lay hexagons and triangles out in desired positions. Use the photo from the pattern or choose your own combinations.

Row 1 is assembled like the diagram below.

Row 2 – dashed lines indicate piecing guidelines

Continue piecing rows, then sew together to complete the quilt center. Trim completed quilt center to 1/4" from outer star points.

Among the Stars

Measure the length of the quilt through the center. Piece white solid inner border strips and cut two strips to measured length. Sew to quilt center and press toward the borders.

Measure the width of the quilt through the center. Cut two strips to this length, sew to quilt center and press toward the borders.

Repeat this process for the outer borders. Quilt as desired and bind.
